Product Code: 71213

ABCs OF ENGINEERING

Chris Ferrie

A new book in the bestselling series with
 simple explanations of complex ideas for
 your future genius!

Level 1:
 Start with the basics!

A is for Amplifier

An amplifier makes a signal bigger.

An amplifier has an input and an output. The input is a signal and the output is the same signal with more power! The increase in power is called gain. Turn up the volume, turn up the gain!

B is for Battery

A battery gives power to electric circuits.

Batteries store energy when not in use. When they are connected to a closed electric circuit, they force electric charges to move—creating a current! Not all batteries look the same, but they do the same thing to charges, so they are drawn with the same symbol in circuit diagrams.

Level 2:
